

Directions:

Formulated for use just prior to bud set and throughout the bloom cycle. Add USB to the water or nutrient feed.

As an option you can use it throughout the plant's entire life.

Root Dosage & Application:

Add ½ mL to each gallon of water or nutrient. Or add 1 teaspoon (5ml) for every 10 gallons of water used.

Apply USB to the roots by hand or add to nutrient holding tanks. If USB is added to holding tanks, apply Flying Skull's Z⁷ to the tank every 3-5 days. Add circulation pumps or air stones as well.

Leaf Spray Dosage & Application:

Use 5 mL (1 tsp) per quart of water.

Apply USB to leaves and stems after the use of On Schedule or during bloom. Avoid spraying mature buds. Use different regimens on separate plants to determine how many applications should be applied to future crops.

NOTE: To reduce sprayer clogs mix USB with water then use a filter to remove particulate.

Ultimate Seaweed Blend

0 - 0 - 0.2

Net Contents: 1 Quart (960 ml)

Net Weight: 2.75lbs

Flying Skull's Ultimate Seaweed Blend is blended, top quality seaweed, minimally processed to retain freshness and packaged with care in the USA. USB's proprietary blending of cold-extracted seaweed gives the plant a unique food source and contributes to more flavorful and aromatic produce. This low cost and highly concentrated plant food additive is sure to please the senses and pocket book. Flying Skull is proud that each of its products has superior formulations.

Guaranteed Analysis

Soluble Potash (K₂O)..... 0.20%

Derived From:

Sea kelp (Nereocystis luetkeana Alaria marginata, Laminaria saccharine)
