

Water treated with Essential Flora Extract may be used immediately after it is thoroughly mixed into the water. This product is highly concentrated and any insoluble particulate is micro sized to assure clog free sprayers or emitters.

General Directions for Use:

Use when watering or fertilizing. Always add this product to water first. Then mix in fertilizer and feed. Dosages higher than listed on this label should be considered experimental and results logged for future reference.

Mixing Instructions:

Shake well. Add ¼ milliliter per gallon of water or ½ teaspoon (2.5ml) per 10 gallons of water or 10 teaspoons (50ml) per 200 gallons of water. Mix well into water. Then add fertilizer.

32 fl. oz. (946 ml)

CONTAINS NON-PLANT FOOD INGREDIENTS

Soil Amending Ingredient

10% Humic acid
(from potassium humate, extracted from Leonardite)

Keep out of reach of children. Not for use in drinking water. Flying Skull Plant Products is not responsible when Flora Extract is used for purposes other than described by label directions.
